Minimum technical requirements for Posity Neo as of 25.4.2024

For the proper operation of the Posity Neo software, the following minimum technical requirements for hardware and software must be met (further requirements are possible depending on the application):

Windows Solution (Standard Offering)

- Internet access.
- Microsoft Windows operating system (basic/mainstream support from Microsoft still to be ensured).
- .Net Core for Posity Neo, respektive.Net 4.8 for Posity, and associated libraries must be installed.
- Posity Neo and Posity are distributed and installed using ClickOnce. For this purpose, it must be possible to create a directory for the user, as well as an entry in the Windows start tree.
- Any installed virus scanners, firewalls, or similar must ensure access to the posity servers on the Internet. The current list of this can be found in the 'Startup Issues Help' document.

Browser solution (optional additional service)

- Internet access.
- The display and use is optimized for current versions of Chrome, Edge, Firefox and Safari.
- JavaScript must be enabled.
- Cookies must be allowed.
