

Winterthur, May 2024

## «Posity» is now called «Posity Neo»

Posity Neo - the new generation of Posity - what does that mean?

1. **What will change for me?**

Basically, apart from the name, nothing changes for you (the company name remains Posity, of course). With Posity Neo, you can use your existing application as usual. The old Posity will still be available until the end of 2024, but all new features will only be available in Posity Neo.

2. **What's new about Posity Neo?**

The most important change is not visible at first. The Microsoft technology on which Posity Neo is based has been modernized (for professionals: from the .NET Framework to .NET 8). This is an investment in the future and will enable Posity Neo to run on iOS, macOS and Android in the future.

In addition, Posity Neo has been extended with important features (tabs, themes, hiding columns, etc.). You can find detailed information on how to do this in the [user manual](#) (you can also find the instructions on our [website](#)).

3. **How can I use Posity Neo?**

Go to our homepage ([www.posity.com](http://www.posity.com)) and click on "Start Posity Neo". If you don't need the old Posity anymore and only work with Posity Neo, you can uninstall the old Posity – don't worry, you won't lose any data in the process.

4. **What happens to the old posity?**

We will continue to support the old Posity until the end of 2024. You can use both versions at the same time. However, new features will only be available in Posity Neo.

We look forward to hearing your feedback on how Posity Neo has settled in. As always, we will be happy to answer any questions or comments you may have.

Best regards,
